## Section 3, Health and Safety at Work Act 1974

Businesses have a duty to ensure that customers do not face unacceptable risks.

- Employers must ensure that their customers are not exposed to health and safety risks.
- Customers should be fully informed in situations that may affect their health or safety.

### WE CAN HELP

Traditionally, our most in-demand services for the petrol station sector have included washroom maintenance and floorcare services. Our experts continue to meet the needs of providers in this sector with a wide range of products and services.

#### Reduce the risk of slips and trips

- During rainy weather, petrol station floors can quickly become wet and slippery. Our dirt and moisture-absorbing mats can help, keeping your floors clean and reducing the risk of accidents. Regular laundering services can also be provided to keep your mats working as they should.

#### Hassle-free waste disposal

- With many petrol stations located in remote or difficult-to-access locations, ensuring that waste is properly stored and disposed of can be difficult. We will hygienically dispose of your waste safely and with respect for the environment through LifeCycle, which diverts waste away from landfill, to be used as an alternative fuel source.

#### Flexible contracts to suit your business

- At **phs** we understand that every business is different. That's why we offer flexible contracts, allowing you to pick and choose the products and services you require without overpaying for unneeded extras. For budget-conscious business owners, it's a win-win.

#### Hygienic washrooms for customers and staff

- Nobody wants to use an unhygienic washroom, no matter how desperate they are to use the toilet. Help to make your customer's visit comfortable and stress-free by taking advantage of **phs'** washroom maintenance services. Our accredited team will make sure that your facilities are fit for purpose, leaving drivers with a positive impression of your petrol station.

With the majority of vehicle owners needing to visit petrol stations on a regular basis, the businesses that provide motorists with their fuel have a responsibility to ensure that their facilities are as efficient and user-friendly as possible.

As well as making sure that forecourts have the right safety precautions in place, it's important for indoor areas to be safe and hygienic to continue appealing to customers in need of a fuel stop.

We work with over **2,700** garages in the UK, and with more than 50 years of experience in providing hygiene and safety services to businesses, **phs** has experts based around the country to help make sure your petrol station is a clean and hazard-free environment.

**Did you know?** **phs** offers free site assessments and flexible contracts, meaning you'll only pay for the products and services that your business needs.

**Healthcare, washroom and floorcare hygiene is our business.** We stay on top of all the legislative developments affecting your industry to provide you with expert advice on what you need to do to ensure that your business is legally compliant.

Our professional service drivers provide a discreet and efficient service, calling ahead to check that our servicing times are convenient for your business. And, if any of your products or services need change, we're just a call away and have the flexibility to adapt to whatever is needed.

We're in every geographical area and because we're **Next door. Everywhere**, we are on hand to help wherever you are. And as a single supplier, meeting all your needs, we can help reduce your day-to-day administration commitment as well as your financial costs.

#### Our petrol station blueprint shows the most in-demand services that we currently provide to the fuel sector.

### Adhere to legislation

We will ensure that safety and hygiene at your garage is handled strictly in line with current legislation and according to best practice guidelines.
