

AUTOSAN cistern sanitiser

Helps maintain hygienic WCs and urinals

A cistern sanitiser that deodorises and destroys bacteria in urinals and toilets, helping to keep your washroom clean and hygienic.

Available in

Nickel
Collection

Key features:

- Automatic ongoing operation
- Suitable for WCs and urinals
- Deodorises and destroys bacteria at the source

Maintain hygiene

The **AUTOSAN** cistern sanitiser injects sanitiser directly into the cistern. This ensures that on every flush, all areas of the toilet bowl or trough are treated, effectively eliminating bacteria and leaving the bowl clean, freshened and thoroughly sanitised.

The sanitiser fluid is effective against E.coli and E.faecalis and helps prevent the build-up of limescale, and reduce the growth of bacteria. The fluid has a subtle red berry fragrance which contributes to keeping a fresh atmosphere in the washroom.

Efficient

The **AUTOSAN** operates 24 hours a day, injecting sanitising fluid into the cistern every 2 hours. This can be adjusted to suit the footfall of your washroom, dispensing every 1 hour, 1 ½ hours or 4 hours, ensuring you get the maximum benefit.

Fully serviced

The **AUTOSAN** is a fully serviced item, with **phs** ensuring that it is always fully functioning and dispensing sanitiser into the cistern without any input from your staff.

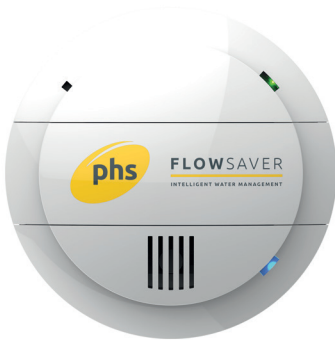

After every service, you'll receive an immediate automated email confirmation detailing the site and products serviced. We'll provide a time-captured signature, showing exactly when your service was carried out and who acknowledged our visit, so you can be sure you've got a complete service audit trail.

Product specification

Sizes	20.4cm x 26.5cm 9.9cm
Weight	0.8kg
Operation	Battery operated (4 x AA alkaline batteries)
Construction	Strong and durable ABS plastic construction
Installation	Suitable for use with septic tanks

For best results

phs recommends using the **AUTOSAN** in conjunction with the **phs FLOWSAVER URINAL**, **MICRAKLEEN** and **ECOSHIELD** for maximum hygiene results.

FLOWSAVER URINAL

Using innovative patented technology, the **FLOWSAVER URINAL** urinal water management system prevents unnecessary urinal flushing and ensures the perfect balance between hygiene and cost.

ECOSHIELD

Removes blockages and keeps urinal traps and pipe work clear, enhancing the washroom appearance and improving its environment for staff, visitors and customers.

MICRAKLEEN

MICRAKLEEN won't damage the bacteria balance. It is extremely versatile and can be used on all surfaces across the washroom, including diluted on floors and tiles.
