

> AIRSTREAM CLEAN

Improves air quality by safely removing germs, allergens, and unwanted odours from interior air.

A compact easy installation unit.

The air-purifying unit is a solution that enhances the quality of your entire facility by filtering out airborne viruses, odours and removing harmful germs, allergens and other irritants from the air. It is an ideal air purifier for washrooms.

The carbon filter tackles washroom odours which then allows the air fragrancing to reach its max potential. The HEPA filtration helps to remove airborne virus particles not just COVID19.

KEY FEATURES

- Highly effective hybrid (HEPA and carbon) filtration
- Unit is compact and wall-mounted to seamlessly integrate into any environment
- Easy installation and fully serviced
- Low power/low cost
- Movement detectors tailor to the air flow speed to suit room occupancy.

Fan Speed	W	rpm	Db(A)	Time on (Hrs)	Cost (p/day)
High	45	1160	58	6	4.05
Med	34	850	45	6	3.06
Low	26	565	40	12	4.68
Power Cost (p/kWhr)				Total	11.79

The Benefits of Clean Interior Air

- Reduces absenteeism from allergies, asthmas, colds and flu.
- Creates a positive and health-focused environment for building users to enjoy.
- Improves productivity while improving perceptions of your premises.

Movement detectors for efficient air cleaning

The **AIRSTREAM CLEAN** uses movement detectors to filter occupied rooms on maximum power (180 M³/Hr).

If a room is unoccupied for 30 minutes, the air flow reduces to medium power (**130 M³/Hr**). If no movement detected is for 2 hours, the air flow reduces to minimum power (**85 M³/Hr**)

Fully-Serviced

Expert **phs** technicians will install your **AIRSTREAM CLEAN**. They will then undertake an ongoing 2 p.a service to replace the filter and ensure the device is working efficiently.

Technical Data

Effective Area	15 - 25 (m ²)
Filter Volume	3500 cc
Power	45 W
Air Flow	3 fan speeds; 85, 130, 180 (m ³ /Hr)

Product Dimensions (HxWxD)

Unit	288 x 436 x 185 mm
Filter	350 x 200 x 50 mm
Installation	Wall Mounted
