

18%
of men with urinary
incontinence have flushed
products down the toilet,
**risking blockages and
environmental harm.**

By choosing to facilitate these bins, you are aligning yourself with our commitment to **diverting hygiene waste away from landfills** and **saving you money** from potential maintenance and unblocking of toilets.

Thanks to our **LifeCycle Strategy** and our partnership with waste management company, **Panda**, we go the extra mile to ensure the waste we collect from our customers is diverted away from landfill and turned into an alternative fuel source.
