

Tuff Mat

> A stiff scraping and deep pile help to prevent heavy deposits such as mud, snow, sand and grit, from entering your building.

Manufactured specifically for heavy duty and outdoor applications, the Heavy Duty Scraper mat acts as a tough first line of defence in all weather conditions. Its hard wearing construction – made of strong solution dyed mono filament yarns – removes excessive dirt and moisture, such as heavy deposits of mud, snow, sand and grit. This unique textile provides a stiff scraping action to capture the heavy dirt particles which the deep pile traps and conceals.

The Solution Dyed Nylon fibres are UV resistant, meaning that they are extremely colourfast – even when regularly exposed to strong sunlight. Rigorous tests simulating the worst possible weather conditions have confirmed the extraordinary durability of this unique product. The mats are available in a functional dark grey colour.

Key Features :

The Tuff mat is a great choice where there is a high probability of heavy dirt or debris entering the building. Also, it works well where entrances have two doors with the Tuff mat first, in between the doors & a standard or principal mat inside the building. The Tuff mat will always ensure the maximum dirt & moisture is captured on entrance.

Product Specification

Sizes	85x150cm, 85x300cm, 115x200cm
Thickness	10mm
Colours	Graphite Grey

Key Benefits :

The Tuff matt offers the most rigorous solution to safeguarding business premises from dirt & moisture.
