### SMITHS METAL CENTRE

**LOCATION**  
Wolverhampton

**INDUSTRY**  
Stockist / Distributor

**EMPLOYEE SIZE**  
15

#### THE CHALLENGE

Previously, the whole area by the saws was a huge health and safety risk due to the trip hazard of the 'raised' housings that contained the machine wires to the mains.

#### THE RESULT

The mats that you fitted gave us far more than addressing the H&S issue. Our operator never complains anymore about the tiredness in his legs of standing on the Saws all day, so the anti-fatigue is not just a gimmick.

Finally, the area itself looks far more professional and tidier. We are now the envy of all the other Smiths Centres around the country.

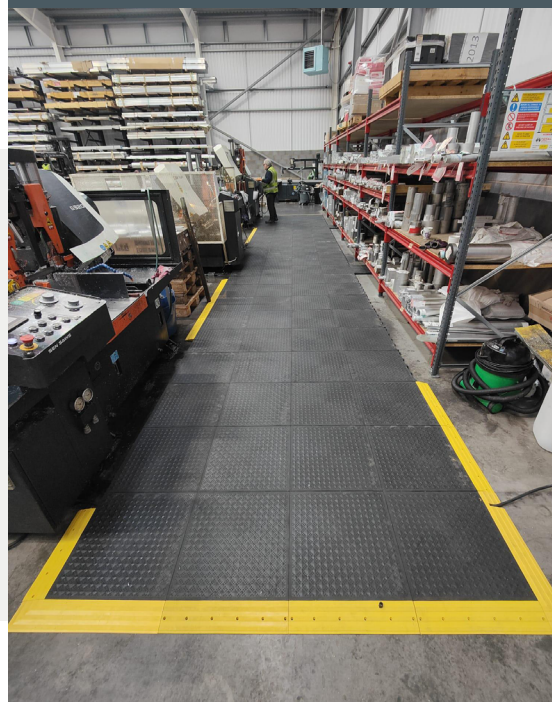

#### ANTI-FATIGUE MATTING

Employees standing up all day in areas like check-out stations, service counters, and assembly lines or behind bars need physical support to keep motivation and energy. The Comfort anti-fatigue mat concept is specially designed for safety, comfort and protection.

# SMITHS

I have found **phs** can take a lot of pain away by dealing with one company as opposed to lots of suppliers. **phs** provide several services to us and look after us professionally. Paul and the team are always quick to react when we need help or advice.

**Gary Bowers** – Service Centre Manager
